

**Health and
Safety Index**[®]
A FEFO Consulting Company

Enable health & safety
improvements that matter

OUR SOLUTION

The 'Health & Safety Index' is an online tool that helps organisations measure, focus and act on valuable data to enable health & safety improvements that matter.

WHY THE INDEX

The Health & Safety Index enables you to talk with your workforce, receive feedback at scale and put all their voices in one place.

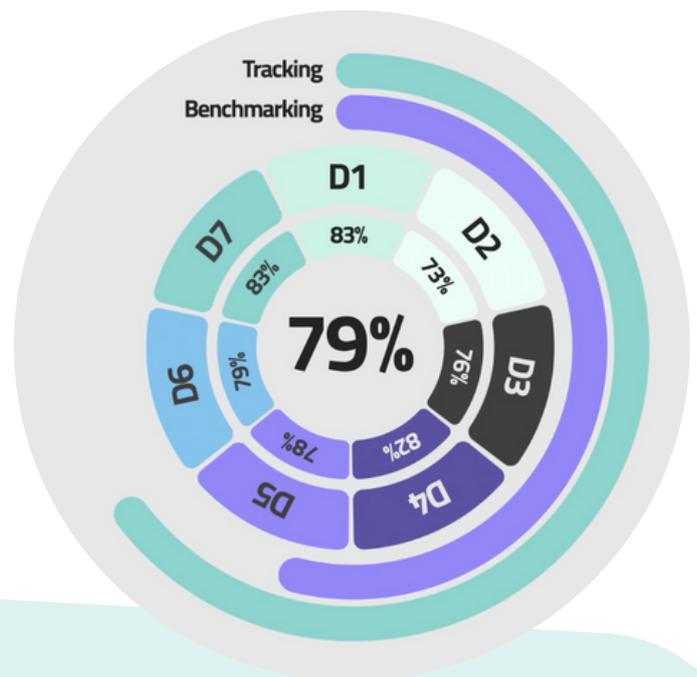

We have designed an integrated set of survey questions to provide a holistic view covering **4 Aspects**, including Safety Leadership, Safety Engagement, Health & Wellbeing and Safety Systems.

Your entire organisation can be engaged to help you answer important questions. Results can be compared across your business-specific demographics and **7 Dimensions** to measure, focus and act on areas that matter:

1. Care & Concern
2. Clear Expectations
3. Collaborate & Enable
4. Execute with Excellence
5. Decision Making & Courage
6. Recognise & Respond
7. Conditions & Experience

Consolidated Results

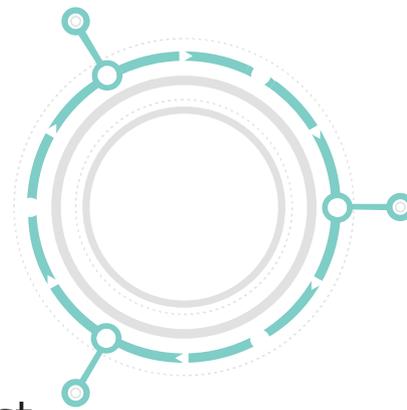

Results are consolidated to provide **1 Index** for tracking and benchmarking results overtime to monitor progress and build high levels of performance.

EMPOWER YOUR ORGANISATION

The Health & Safety Index gives your organisation the power to measure, focus and act on valuable data.

Measure

Focus

Act

“FEFO Consulting was engaged to undertake a Health & Safety Index for HCCDC. The process was simple and the results provided a useful snapshot of current performance and identified focus areas for potential improvement.”

Steve Aebi, Project Leader
